Certain-teed Roofing is Spark-Proof

Certain-teed will protect your property against fires due to sparks dropping on the roof from passing engines. It also helps to prevent fires spreading from building to building by means of sparks and burning embers.

Where fires have started in other parts of the building, Certain-teed Roofs tend to smother them and thereby prevent

serious damage to other property. This type of protection is appreciated by all property owners and particularly by those who are outside of the zone of adequate fire-fighting apparatus.
